KUMARI GARIMA

AI & ML Engineer
kumari.garima2703@gmail.com • linkedin.com/in/kumari-garima • github.com/kumarigarima09 • kumarigarima09.github.io

PROFILE

AI and ML focused Computer Science Engineering student with hands on experience in Python, Machine Learning, Computer Vision, Generative AI, LLMs and backend development. Experienced in building real world AI applications using Python, PyTorch, TensorFlow, YOLO, OpenCV, FastAPI, Flask and MongoDB. Strong interest in scalable AI systems, event driven architectures and production ready AI solutions. Comfortable using Claude, GitHub Copilot and Cursor for AI assisted coding, debugging and development.

EXPERIENCE

Gen AI Intern | *Liberin Technologies, Noida* Apr 2026 – Jul 2026

- Developed AI/ML and Generative AI solutions for real-world business problems.
- Worked with LLMs, prompt engineering, model optimisation, and deployment.
- Built intelligent applications involving automation, computer vision, and conversational AI.

AI/ML Intern | *AIPARK Automation Pvt Ltd (Remote)* Feb 2026 – Mar 2026

- Developed AI/ML solutions, optimised models, and worked on computer vision and automation projects.

AI/ML Intern | *Vizolane* technologies pvt ltd Aug 2025 – Nov 2025

- Performed data preprocessing, model training, evaluation, and optimisation.
- Collaborated with cross-functional teams to deliver AI-driven solutions and end-to-end ML workflows.

KEY PROJECTS

Women Safety Application | *Flutter / React Native, Google Maps API, Firebase*

- Developed a mobile safety application integrating GPS tracking, SOS alerts, and geofencing.
- Selected among Top 10 AI teams at Smart India Hackathon (SIH).

CCTV Criminal Detection System | *OpenCV, TensorFlow, Python, Deep Learning*

- Built real-time surveillance using face and object recognition for criminal detection and alert generation.

IGL Gas Station Vehicle Analytics | *YOLOv8, DeepSORT, Python*

- Developed an automated vehicle tracking and counting pipeline for IGL CNG stations to streamline traffic flow, monitoring, and operational analytics.
- Implemented real-time vehicle detection, tracking, and counting dashboards to improve station efficiency and reporting.

Cow GOT – Gaushala Optimization & Tracking | *YOLO, FastAPI, Next.js, PostgreSQL/MySQL*

- Built an AI-powered cattle monitoring system for gaushalas to track cow health, behavior, and productivity in real time.
- Enabled data-driven decision-making for livestock management, reducing manual effort and improving animal welfare.

Smart Traffic Management System | *IoT Sensors, React.js, Node.js, Cloud*

- Designed an AI and IoT-based traffic control system with vehicle counting, classification, and adaptive signal control to reduce congestion and improve road safety.

AI Menstrual Health Support Chatbot | *Python, NLP, Chatbot Frameworks*

- Built an AI chatbot providing menstrual health guidance, cycle-related information, and basic wellness support.

AI Astrologer Chatbot | *Python, NLP Concepts, Chatbot Frameworks*

- Developed an AI-powered chatbot delivering personalized astrology-based responses using user inputs.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) Aug 2023 – Jun 2027

Meerut Institute of Engineering and Technology (MIET), Dr. A. P. J. Abdul Kalam Technical University

SKILLS

Programming: Python, C++, SQL,Java

AI and ML: Machine Learning, Deep Learning, Generative AI, LLMs, Computer Vision, PyTorch, TensorFlow, YOLO, OpenCV

Backend: FastAPI, Flask, REST APIs, Node.js

Databases: MongoDB, PostgreSQL

AI Tools: Claude, GitHub Copilot, Cursor, Gemini API, LangChain, Prompt Engineering

Tools: Git, GitHub, VS Code, Google Colab, Docker

Soft Skills: Team Leadership, Project Management, Mentoring, Public Presentation, Problem Solving

ACHIEVEMENTS & LEADERSHIP

- Smart India Hackathon (SIH) – Ranked in Top 10 AI Teams nationally.
- Trikon 2.0 Hackathon – 1st Runner-Up.
- Dev Gathering 2025 – Recognized among top teams.
